

# Centralize entity data. Reduce risk. Operate with confidence.

## Built for modern legal operations

Legal teams need control, speed and visibility to effectively manage risk and support the business. Athennian centralizes entity data, automates compliance tasks and streamlines workflows so legal can act faster and operate with confidence.

## Solving legal governance challenges

### Fragmented Entity Data

Spreadsheets and outdated systems limit visibility into ownership, officer roles and jurisdictional status.

### Manual Compliance Workflows

Tracking deadlines, filings and registrations without automation increases workload and risk.

### Inefficient Document & Signature Management

Legal teams often lack version control or integrated signature tracking, leading to delays and rework.

### Cross-Functional Misalignment

Legal, tax and finance frequently operate from different data sources, causing friction and errors.

## What Athennian delivers

- **Centralized Entity Management**

Manage all corporate records, D&O details and filings in a secure, auditable system.

- **Integrated Document & Signature Workflows**

Store and manage documents with full version history and embedded e-signature tools.

- **Secure Collaboration with Internal & External Stakeholders**

Provide controlled access to outside counsel, executives and compliance teams.

- **Automated Compliance Tracking**

Never miss a filing or renewal with task automation across jurisdictions.

- **Real-Time Structure Visualization**

Instantly generate org charts to support board reporting, disclosures and corporate transactions.

## Platform features

Centralized legal entity and D&O data

Dynamic org charts and ownership visualizations

Jurisdiction-based compliance workflows and alerts

Role-based access controls and audit history

Integrated document management and e-signature support

API integrations with ERP, GRC and compliance systems

## Results that matter
