Overview

As you read this booklet, you'll gain valuable insights into the hidden costs of manual data management and the inefficiencies it causes in organizations today. We'll guide you through a framework to assess your current losses and calculate the potential value that AI can offer.

You'll discover why Athennian AI is the best solution for overcoming these challenges, providing a path to streamlined, cost-effective entity management. By the end, you'll be equipped with the knowledge and tools to make strategic decisions that propel your organization forward.

Introduction

In the fast-paced world of modern business, efficient entity data management is not just an advantage—it's a necessity. Properly handling this data is key to ensuring regulatory compliance, enhancing operational efficiency, and making informed strategic decisions.

At Athennian, our core mission with AI is to minimize manual data entry, transforming the way businesses manage entity data. Our cutting-edge solutions enhance accuracy, build trust and promise to drive significant reductions in manual processes.

The True Cost of Data Inefficiency in Entity Management

Why Most Systems Fail

Entity management systems frequently fall short of their goals, **with 96% of implementations** failing to meet expectations.

The primary cause of this failure—accounting for 72% of cases—is the overwhelming **challenge of keeping the software updated** amidst the large volume of data entry required to maintain a single source of truth.

Data accuracy naturally **deteriorates at a rate of 20–30% per year**, meaning that without continuous, labor-intensive maintenance, the value of an entity management system diminishes rapidly as data becomes outdated.

Regulatory Complexity and Data Challenges

Legal and finance teams face increasingly complex regulatory demands, such as ultimate beneficial ownership (UBO) reporting and Pillar-2 global minimum tax compliance, to name just a few.

Maintaining accurate and up-to-date entity data is more critical than ever, yet many teams are stretched thin, struggling to balance competing priorities. The unstructured nature of subsidiary governance data exacerbates these challenges, leading to **information silos, increased costs, and heightened risks**.

Uncovering Hidden Inefficiencies

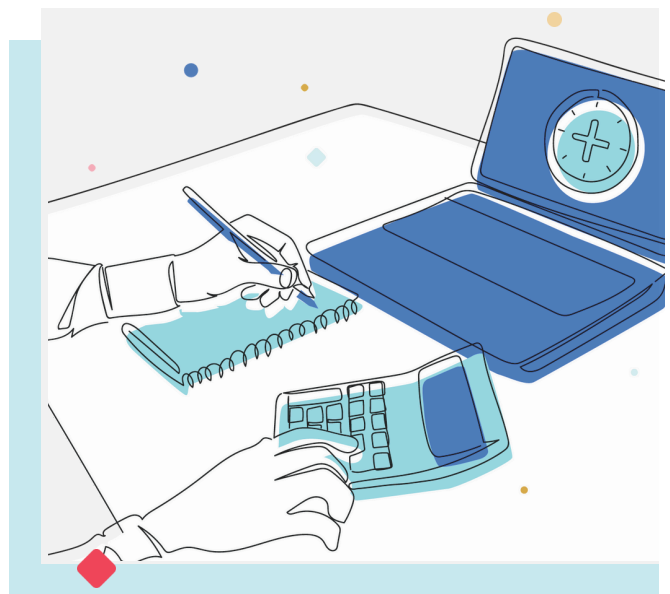

Where to start

To understand the cost of inefficiencies in your entity data management, begin by examining how much time your team spends on manual data entry.

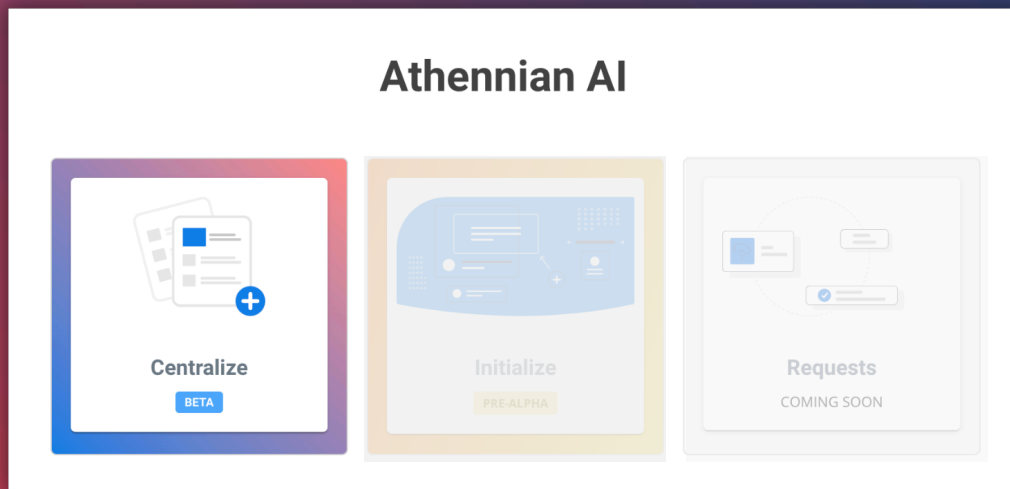

- ◆ On average, organizations process between 2,000 to 4,000 documents annually, with each one taking at least 4 minutes to review.
- ◆ Adding this data to your entity management software can take up to 45 minutes per record, with daily efforts required to keep everything current.

Calculate the hours your team dedicates to these tasks each year and the associated costs in salaries and overhead. Also, consider the extra time spent correcting errors and managing data decay. What you'll uncover is a significant drain on resources—one that Athennian AI can transform into streamlined productivity.

To make this even easier, we offer pre-built ROI calculators that can help you assess the potential cost savings for your organization. If you want to explore this further, don't hesitate to get in touch with us.

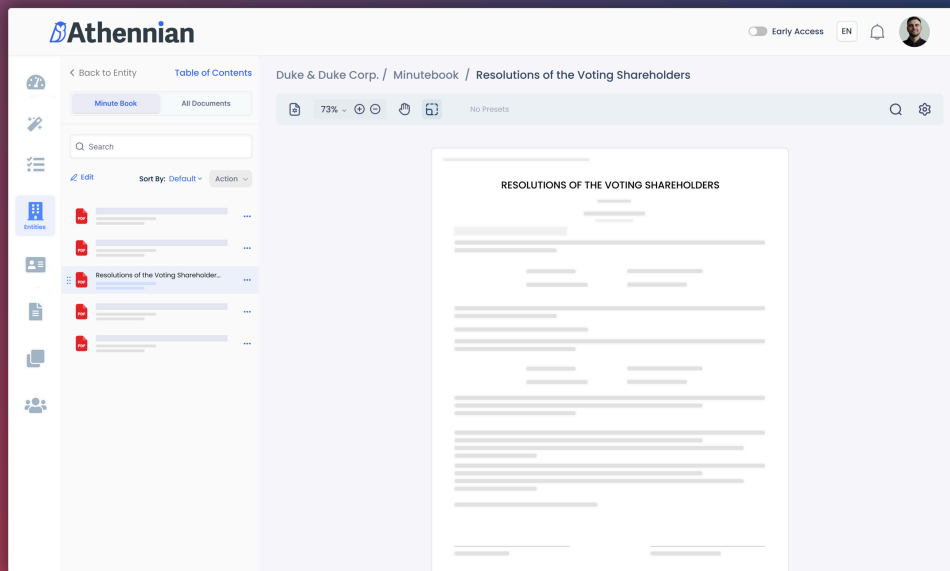

The Solution: Athennian AI – Centralize

In a market saturated with AI products that prioritize flashy features over substance, Athennian AI's Centralize skill stands out by tackling the core issue of eliminating manual data entry.

Centralize was designed to transform document filing and tagging within entity profiles, addressing real challenges head-on. By automating these tasks, Centralize **reduces time spent by 90%**, allowing your team to focus on strategic activities instead of tedious data entry.

Unlike AI tools that replicate existing workflows, Centralize ensures documents are accurately categorized and tagged with essential metadata, such as effective dates. This precision keeps your data current and reliable, significantly reducing the risk of errors that could lead to compliance issues and maintaining the integrity of your entity management system.

Key Benefits of Centralize

- ◆ **90% Reduction in Filing Time:** Centralize dramatically reduces document management time, providing substantial savings for your team.
- ◆ **120+ Hours Saved Per Year:** Based on processing 4,000 documents, Centralize eliminates over 120 hours of manual data entry, allowing your team to reinvest that time into higher-value tasks.
- ◆ **Enhanced Accuracy:** By automating data entry, Centralize helps prevent data decay over time, maintaining the reliability and integrity of your entity management system.

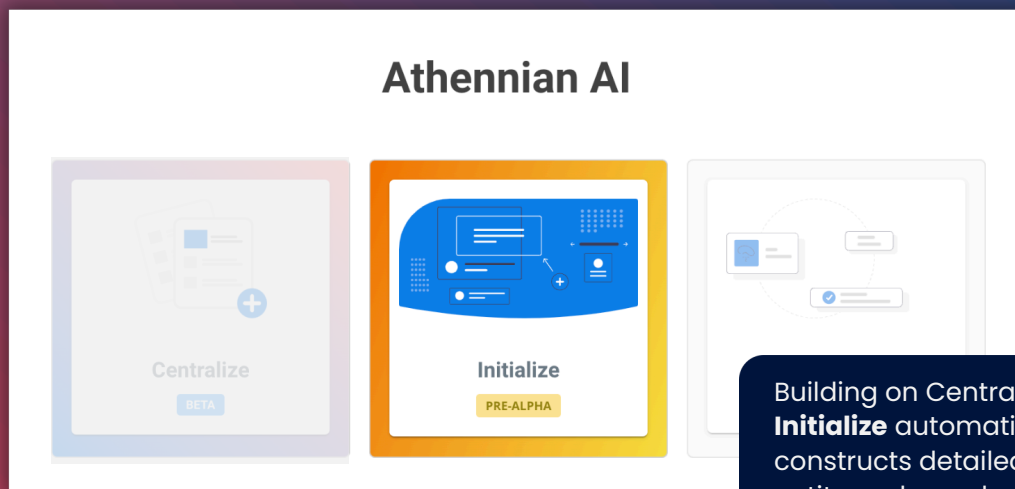

"Athennian AI advances our vision of maintaining a high-quality source of truth while eliminating manual data entry. The Athennian Team is proud to be setting a new standard in today's entity management landscape."

Asaf Inger
Senior Vice President of Service & Delivery, Athennian

The Future: Athennian AI – Initialize

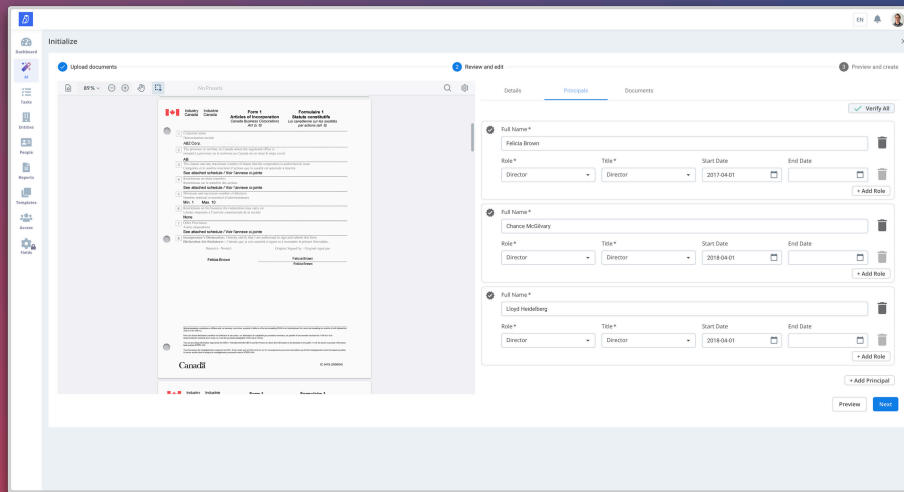

As Athennian AI evolves, the upcoming Initialize skill takes the next step in eliminating manual data entry and streamlining entity management.

Building on Centralize; **Initialize** automatically constructs detailed entity and people profiles from organized data, cutting entity setup time from 45 minutes to **under 10 minutes.**

Seamlessly integrating with your workflows, Initialize enhances efficiency by automating entity creation and setup. It ensures accurate, organized data, maintaining a comprehensive single source of truth.

With every 150 entities created, Initialize saves 88 hours, allowing your team to focus on higher-value tasks. It also prepares your organization for future growth by automating the complex processes that hinder progress.

Key Benefits of Initialize

- ◆ **Automated Entity Creation:** Streamline the setup process, reducing the time required from 45 minutes per entity, to under 10 minutes per entity.
- ◆ **Seamless Workflow Integration:** Simplify the management of new entities with minimal manual effort.
- ◆ **Significant Time Savings:** Save an additional 88 hours for every 150 entities created, maximizing efficiency and productivity.
- ◆ **Strategic Preparation:** Equip your teams and entity management system for the next stages of your organization's strategy and growth by automating complex, manual processes that hinder progress.

The time and cost savings Athennian AI brings to entity management processes are **substantial, immediate, and scalable.**

Product & Development Team, Athennian

Make an Impact in Your Organization

Imagine reducing manual data entry time by 90%. With Athennian AI, your team can:

- ◆ Save **120 hours** of human time **for every 2,000 documents** filed and tagged with Centralize.
- ◆ Gain an additional **88 hours** for every **150 entities created** or managed using Initialize, freeing up time to focus on strategic growth instead of mundane tasks.

Athennian AI goes beyond streamlining processes—it **transforms them**. By automating entity setup and document management, you empower your team to focus on driving your organization forward.

Unlock the full potential of your team and accelerate your growth. With Athennian AI, efficiency isn't just improved—it's revolutionized.

Implementation and Integration

Athennian AI is designed for **easy implementation** with no disruption to existing workflows. The features focus on specific data entry tasks ensures users can quickly adapt and see immediate benefits.

The upcoming Initialize skill will integrate seamlessly, further enhancing your entity management capabilities. Our support team is ready to assist with comprehensive training and resources to help your team maximize the benefits of Athennian AI from day one.

Transform Your Entity Management

Adopting AI in entity management is not just a technological upgrade; it's a strategic necessity in today's complex regulatory environment.

Athennian AI leads the way with solutions like Centralize and the upcoming Initialize skill, designed to address the core challenges of data entry, compliance, and operational efficiency. By focusing on the most critical tasks, Athennian AI delivers real, measurable value that helps businesses stay competitive and compliant.

Are you ready to transform your entity management processes with AI? Visit www.athennian.com, or contact our team to schedule a personalized demo and see how Athennian AI can help your organization achieve greater efficiency and accuracy.
